CS342 · VISUAL PROGRAMMING

What Repeats 471 · 462 · 461

Questions repeated across the past midterms

Muharib

What's inside

01 Question types

02 What to memorize

03 The messages word for word

01 Question types

Type	471	462	461
Find Output on exceptions	✓		
Find Output on inheritance and casting	✓		
Write a window's code from a picture	✓	✓	✓
A full converter: inner classes, exceptions, JOptionPane		✓	✓

Writing a GUI came in all three, and the full program came twice with the same template. The "GUI Program Template" file covers it line by line.

02 What to memorize

Topic	Where	The key point
Integer.parseInt on a non-integer	471 · 462 · 461	NumberFormatException: letters, a space, "2.3"
A custom exception	471 · 462 · 461	**class X extends Exception**; **super(s)** is read by **getMessage()**; **toString()** is what **println(e)** prints
A catch inside a loop	471	The exception ends only that iteration; the loop continues
A downcast to the wrong type	471	Compiles, but ClassCastException at run time
A method the child does not override	471	The parent's version runs
A window with several rows	471 · 462	GridLayout(n, 1), each row a JPanel with a FlowLayout
The buttons	462 · 461	An inner class implementing ActionListener, plus addActionListener(new ...)
Error messages	462 · 461	**JOptionPane.showMessageDialog(null, msg, title, JOptionPane.ERROR_MESSAGE)**
The Cancel button	462 · 461	**setText("")** on every field
The window size	461	**setSize(450, 100)** or **pack()**

03 The messages word for word

Case	Title	Message	Icon
Empty	Empty Input	Enter the seconds Value to convert	WARNING_MESSAGE
Not a number	Error: Input Format	Enter the seconds as a numerical Value	ERROR_MESSAGE
Out of range	Error: Invalid Input Value	Enter the seconds Value in the range [0..86400].	ERROR_MESSAGE
Negative	Input Error	enter a positive value	ERROR_MESSAGE
