Time Converter · بناء النافذة · محارب

GUI · Time Converter Problem

Our goal is to create a GUI that can convert a value in seconds into hours, minutes, and seconds. The user enters a value between 0 and 86,400 seconds. The button Convert calculates the time in hours, minutes and seconds, and the button Cancel clears the fields.
Example: 12,500 seconds → 3 hours, 28 minutes and 20 seconds.

النطاق هالترم

المطلوب **بناء النافذة بس**: الكلاس، والمكونات كـ attributes، والـ layout. تشغيل الأزرار (ActionListener) والرسائل (JOptionPane) **برا النطاق**، فما تكتبها.

TO IMPLEMENT

(1) Create a class called TimeConverter, defined as the main GUI window. (5 Marks)

(2) Define all GUI components (buttons, text fields, labels) as attributes of the class. (3 Marks)

(3) Set the GUI size to 450x100 with setSize(450, 100) in the constructor.

Write the class TimeConverter Code
