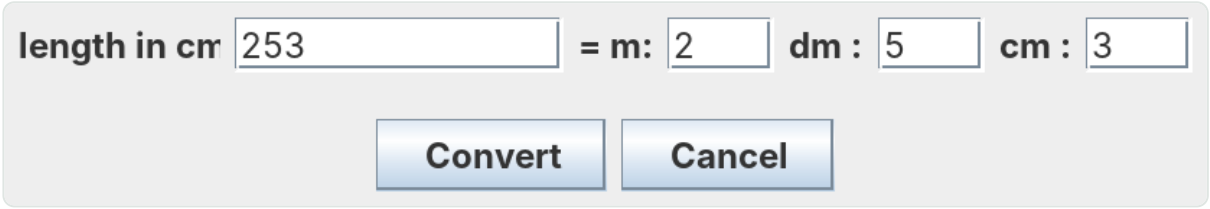
Midterm 462

Length Converter · بناء النافذة · محارب

GUI · Length Converter `Problem`

Create the GUI "Converter" that converts a length in cm into m, dm and cm (1 m = 100 cm, 1 dm = 10 cm). Example: 253 cm = 2 m, 5 dm, 3 cm. The button Convert performs the conversion, and the button Cancel clears the fields.



النطاق هالترم

المطلوب **بناء النافذة بس**: الكلاس، والمكونات كـ attributes، والـ layout. تشغيل الأزرار (ActionListener) والرسائل (JOptionPane) **برا النطاق**، فما تكتبها.

TO IMPLEMENT

Write the class Converter, defined as the main GUI window, with all the components as attributes of the class.

Write the class Converter `Code`
